ADDITIONAL INFO

Booth Construction - Canopies, tents & overhead structures

Canopies MUST have a tag attached to the tent that states the Canadian fire certification on the tag (the certification is CAN/ULC-S109). If it does not have this certification, the fire department will ask the exhibitor to take the tent down.

Booth Construction - Large banners

Large banners or any large amounts of fabric (for example larger than 5 feet by 5 feet) that are part of your display must have the same Canadian certification (CAN/ULC-S109). Please have this certification ready in your booth for the fire inspector. If it is not certified, the exhibitor can do a flame test on a small piece of the fabric and have this ready for the fire department with their booth.

Booth Construction - Trees, wood chips, and hay

Any fresh cut trees need to be tagged with the date they were cut. Any wood chips, hay bales etc. must be treated/sprayed with a fire retardant chemical.

Booth Space Includes

Each booth space includes 1 skirted table and 1 chair; if no table or chair is required please let us know as before May 1st, 2023 by emailing marketing@calgarymarathon.com. *Electricity is not included in booth cost and must be ordered and paid for separately through the portal.

Electricity & Internet at booth
